

## Maintenance Machine

For cleaning artificial turf surfaces.

### TERRA CLEAN 100

For cleaning artificial turf surfaces.

The TERRA CLEAN 100 is a ground driven maintenance machine for efficient removal of surface debris and is suitable for utility vehicles. Debris is collected by means of a cylindrical cleaning brush consisting of four brush rails, which transport the debris and some of the infill onto a vibrating screen. The vibrating screen separates the debris from the infill material, then returns the infill back onto the field while collecting the debris in a basket that can be easily removed.

The TERRA CLEAN 100 has a central height adjustment. In addition, the brush and vibrating screen can be easily disengaged for transport from one location to another.

#### TECHNICAL DATA

<b>Length without attachment in approximate inches:</b>	48	<b>Height in approximate inches:</b>	24
<b>Length with attachment in approximate inches:</b>	91	<b>Outside width in approximate inches:</b>	65
<b>Working width in approximate inches:</b>	48	<b>Ground drive:</b>	2 wheels at 16" diameter each

Descriptions and illustrations are not binding. Changes in design and execution are possible.
